

ALMAYATECH

For Technical Solutions

From : Almaya Technology

To: Al Zaini

OVERVIEW

Almaya Technology Company is pleased to submit this proposal for services to support Alzain Factory and improving sales van process and enable the company to follow and update the sales van activities.

The Main Objectives

1. Monitor sales vans in real time and record stop points and roads
2. Monitor sales vans freight using scan code to update the load in and out
3. Calculate price using scanned out materials and get prices
4. Record/retrieve client information with every invoice
5. Send invoice via WhatsApp to the client and factory assigned department (users)
6. Request material from store via manual selection by the sales person
7. Enable the financial department to update the store via the system about sales person monetary situation

The Main Reporting

The system enable the admin to get reports as follow:

- Report for sales van in all time
- Periodical Report for sales van
- Periodical Report for all sales
- Client all activities report
- Financial report based on time , sales van , and/or client.
- Map with stop point for van
- Direct print invoice from the application. Using portable printer in each car. The development team will recommend printers and ensure the integration between the app and the printer.

The Solution

- Android APK distributed locally (Not on google play store)
- Admin web panel
- API connection with the current system
